PROFESSIONAL SUMMARY

Senior Backend Developer with 10+ years of experience in PHP and Laravel, specializing in building scalable systems and RESTful APIs. Proven expertise in designing high-performance backend architectures, ERP systems, and SaaS platforms. Strong background in system integration, automation, and distributed systems.

CORE SKILLS

PHP, Laravel, Object-Oriented Programming (OOP), MVC, SOLID Principles, Design Patterns, RESTful APIs, API Integration, Backend Development, Software Architecture, Scalable Applications, Multi-Tenant Architecture, SaaS Platforms, ERP Systems, HR Systems, MySQL, Database Design, Query Optimization, Performance Tuning, Authentication, Authorization, Role-Based Access Control (RBAC), Linux, Git, Composer, CI/CD, Webhooks, Queue Management, Event-Driven Systems, System Integration, Workflow Automation, n8n, Firebase

PROFESSIONAL EXPERIENCE

Senior Backend Developer | CEMEX Egypt | Oct 2017 – Present

- Engineered and maintained enterprise Laravel applications serving 1,000+ users across business-critical workflows.
- Architected RESTful APIs processing 10K–30K requests per day for internal and operational systems.
- Implemented ERP and HR modules with role-based access control, secure authentication, and structured permissions.
- Optimized backend execution and database performance, increasing overall efficiency by approximately 25–35%.
- Administered Linux-based production environments and supported 99%+ system uptime.
- Collaborated with stakeholders to translate operational requirements into scalable backend solutions.

Mobile Developer (Flutter) | Exception Tech Group | Jan 2017 – Present

- Built Flutter applications connected to Laravel REST APIs for business and service-oriented use cases.
- Delivered mobile solutions adopted by 500+ active users.
- Integrated Firebase authentication, push notifications, and backend-connected user flows.
- Coordinated API consumption and data exchange between mobile front ends and server-side services.

Backend Developer | Ibsina Pharma | Nov 2015 – Dec 2016

- Created backend services and internal APIs for business applications using PHP and MySQL.
- Structured database schemas and strengthened backend logic for internal operational tools.
- Supported feature delivery, maintenance, and issue resolution for day-to-day business systems.

Backend Developer | TE Data | Oct 2014 – Oct 2015

- Contributed backend components for internal platforms and service modules.
- Assisted with database operations, debugging, and backend feature enhancements.
- Partnered with technical teams to improve reliability and maintainability of existing systems.

Automation & Integration Engineer (n8n) | Contract / Internal Projects | 2019 – Present

- Orchestrated workflow automations using n8n for HR processes, notifications, and reporting pipelines.
- Integrated systems through webhooks and automated data flows to reduce manual effort.
- Cut repetitive operational tasks by approximately 40–60% through process automation and integration.

EDUCATION

Bachelor's Degree, Faculty of Commerce | Assiut University
